1. Members

For companies wishing to manufacture the EIB system and/or EIB components and who undertake to observe the quality guidelines laid down by EIBA s.c. These companies must be open to inspection as regards the continuous maintenance of conformity to these requirements and must apply the EIB mark in accordance with the EIBA rules. EIBA members must also work for the market success of the EIB system.

For legal reasons a Trademark Licence has to be concluded (at no extra cost) prior to putting any product on the market.

2. Manufacturer's Licensees

For the larger manufacturer who, due to company policy reasons, is not yet ready to become an EIBA member. Entitled to use the EIB Trademark under the conditions stipulated in the EIBA Trademark Rules and the Trademark Usage Guide.

Type a)

Again, for companies contemplating the manufacture of a one-off EIB product. A simple licence without any further information, up-date service or support.

Type b)

Aimed at companies starting to develop an EIB product and interested in developing their product further. For an additional annual up-date fee the licensee receives continuous support, information and up-date service.

An 'A-licensee' who later wants to become a 'B-licensee' must conclude a new licence contract.
